# Our products

Adande's modular units have a very simple and patented design difference – insulated containers. This unique feature enablesthemtoperformbetterthananyotherdrawerinpractically any location, in any kitchen. Proven and reliable, they excel in the most demanding environments and are trusted by discerning chefs and operators in all sectors.

In addition to providing the most stable holding temperature and humidity, which reduces food waste, the design ensures that minimal cold air is lost, keeping running costs low. Adande's unrivalled seal warranties increase the savings further.

Whether freestanding, under counter, used as an equipment stand, or built into a range, with several different sizes and formats, Adande's units can be relied upon in every kitchen section. An increasing number of leading restaurants and hotels rely exclusively on Adande's patented refrigeration in their kitchens. Precise, temperature control at incremental settings from fridge (+59 °F) to freezer (-8 °F) set Adande units apart. Fish held at precisely +1 °C without the need for ice stays fresher for longer, and is easier to fillet. Fresh meat stored in an Adande set at exactly +36 °F suffers less from dehydration and drip loss. Ice creams and sorbets held at +5 °F stay at the ideal serving temperature without any ice crystals forming. Fries spit less when cooked, take up less oil and are cooked to a consistent standard when they have been stored in an Adande. Seafood, pasta, pastries, salad and garnishes are amongst the many other different food types that keep better in a such a stable and precisely controlled environment.

If you care about food, you should choose and use Adande throughout your kitchen.

# Our technology

The first major innovation in refrigeration in over 70 years, our patented 'Hold the Cold' technology functions like no other fridge or freezer in the commercial refrigeration industry.

Totally unique to Adande, the insulated container inside the unit ensures cold air is retained each time the drawer is opened. Conventional refrigeration units use fans to blow cold air around the cabinet but, with Adande, cold air gently falls down onto and around the food in the insulated drawer – we call this 'low velocity cooling'. This design allows chefs to prolong the shelf life of their ingredients and products by preventing food dehydration.

Low velocity cooling ensures the Adande maintains a stable temperature and exceptional humidity control at all times. During frequent or prolonged drawer openings, the impact of high temperature ambient air is minimal, providing a cool and benign microclimate for the storage of food.

Even in the hottest of kitchens, and even when positioned directly under high-temperature griddles and charbroilers in the cook line, Adande drawers perform exactly the same. What's more, the insulated drawer provides a perfect bird's eye view of all products and ingredients, encouraging a speedy service and faster kitchen production.

# What makes Adande drawers different?

#### Insulated container

- The patented 'hold the cold' insulated Adande container saves significant energy compared to traditional refrigerated drawers.
- Large storage capacity, with food accessible in full plan view when open.
- Easy to lift out for deep cleaning.

#### **Drawer runners**

- Hygienic because food cannot come into contact with the runners, as they are external to the insulated container.
- Do not ice up, allowing flexible operation as BOTH fridge and freezer.
- Runners are incredibly strong and robust, having been tested to 500,000 openings.

- Adande magnetic, heated seals are hidden and out of harm's way, reducing wear and tear and protecting them from accidental damage.
- Easy to clean.
- Guaranteed for two years.

#### Condensers

- Housed internally for protection.
- Cleaning is less frequent and much easier because fats and cooking oils do not reach the condenser.
- Low chance of condenser blockage reduces incidence of compressor failure.
- No filter required

# Energy usage

When it comes to looking after the environment Adande Refrigeration is a great partner to have. Compared to other brands in the market, an Adande is a lower energy user, saving you money on energy bills.

Plus up to 3 drawers can run from a standard plug with our daisy-chain fitting.

Can you afford to not have an Adande?

"32% reduction in energy consumption, compared with the equipment used previously"

> Chris Havice Sheetz

> > Store plenty of produce without compromising on unit performance

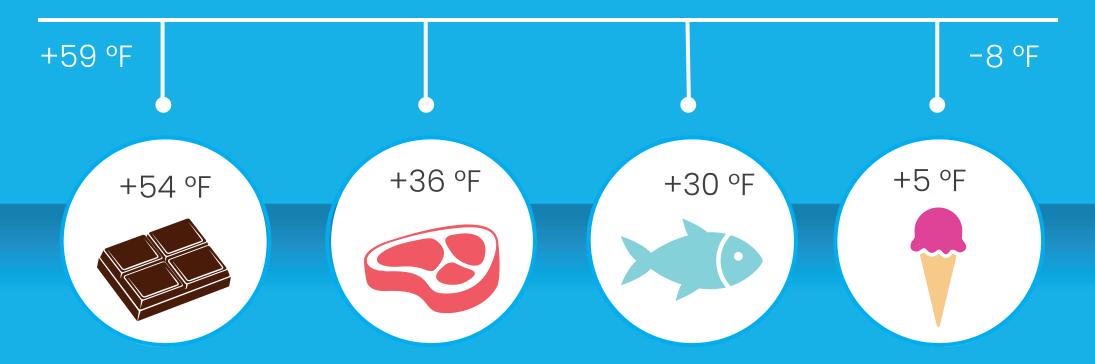

# Larger capacity, smaller footprint

Intelligent design delivers ergonomic benefits and more storage volume.

Adande provides the greatest storage 3.03 cu ft (86L) per standard drawer compared to any drawer unit with the same footprint.

# Temperature flexibility

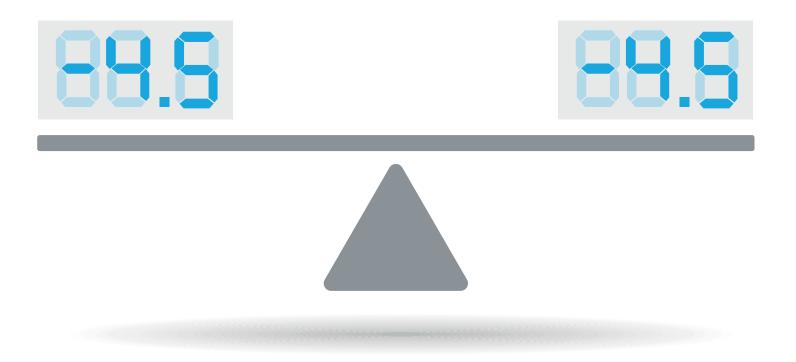

Adande gives you the flexibility to set the temperature to within 0.1 °C to suit the food you are holding. You are able also to change the temperature, from fridge to freezer and back again, as you need. This ensures that Adande refrigeration actively assists in delivering the best quality food for your diners.

An Adande fridge keeps a stable temperature which means food is kept fresher for longer. This helps in the reduction of food waste and also the meeting of sustainability objectives. It also maximizes your bottom line.

#### **Temperature stability**

Precise, temperature control at incremental settings from fridge (+59 °F) to freezer (-8 °F) set Adande units apart. Fish held at precisely +30 °F without the need for ice stays fresher for longer, and is easier to filet. Fresh meat stored in an Adande set at exactly +36 °F suffers less from dehydration or drip loss. Ice creams and sorbets held at +5 °F stay at the ideal serving temperature without any ice crystals forming. Fries spit less when cooked, take up less oil and are cooked to a consistent standard when they have been stored in an Adande. Seafood, pasta, pastries, salad and garnishes are amongst the many other different food types that are better kept in a such a stable and precisely controlled environment.

# From fridge to freezer in less than 30 minutes

Flexibility is a critical consideration when selecting equipment, and Adande drawers excel in this aspect. We offer flexible temperature control, allowing operators to choose a fridge, a freezer, or even a blast chiller for each individual drawer within the same footprint. With just a flick of a switch, the variable temperature units can transition from freezer to fridge in as little as 40 minutes. This versatility in temperature settings, ranging from +59°F to -8°F, enables operators to adapt to changing needs and store a wide range of food items effectively.

# not this but this

# Better fries, less oil

Our patented technology ensures no ice crystallization is left on your produce, and fried goods remain crispy and fresh as the oil isn't impacted by melted ice. This means that customers can enjoy the same level of quality every time they visit your convenience store or restaurant.

"Previous trials with Adande units have seen a **4%**\* lower take up of oil in the fries and longer oil life which represent significant cost savings"

\*as determined by in-store trials and 3rd party testing

**g**et

# Turn up the heat

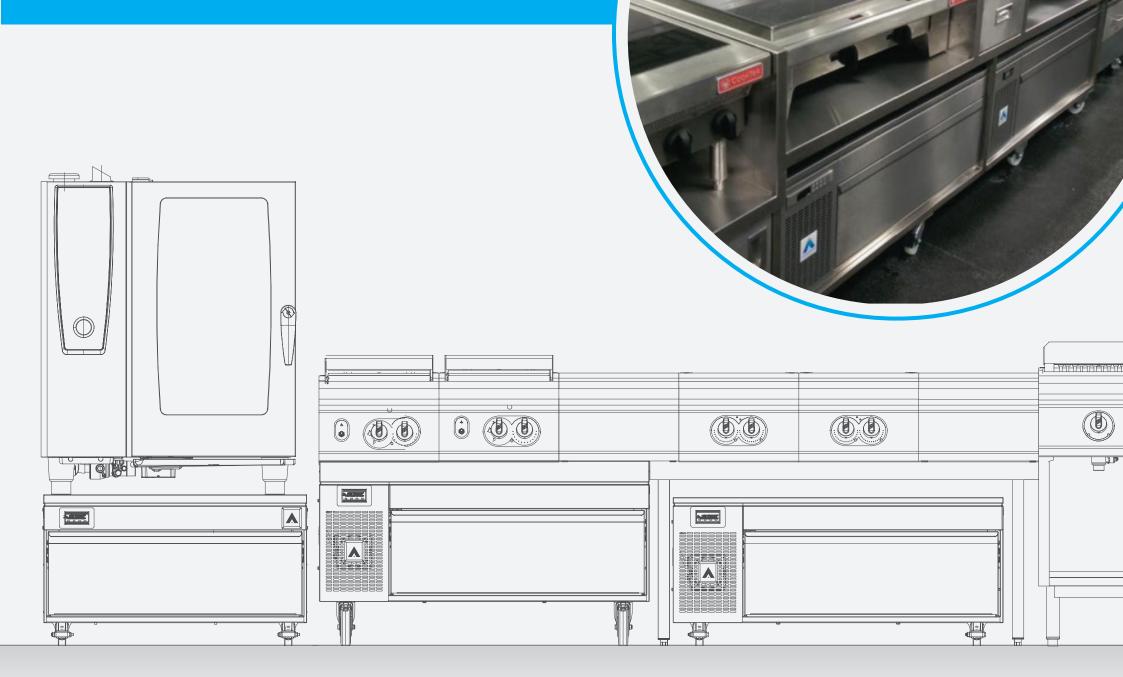

Adande heat shields give unparalleled protection allowing you to position your Adande drawer safely beneath cooking equipment with temperatures of up to 400 degrees Fahrenheit/200 degrees Celsius.

The heatshield protects the fridge housing ensuring that even if positioned under the most intense temperature, your Adande fridge will perform consistently and reliably without issue, even when in freezer mode.

Operators find this particularly useful; some use their Adande under frying stations, some under induction grills, or even under hot coals.

Adande heatshields come as standard with an Adande unit.

# perfect on the cookline

"Temperature fluctuations are not good news in terms of food quality and longevity. We do not experience these problems with Adande and ingredients stay fresher for longer."

Proudly serving

"The large capacity, relative to footprint, means that less refrigeration equipment is required in the kitchen. By using Adande we save four linear feet of space in each kitchen." "Adande drawer units are inherently robust and built to withstand the harshest and busiest kitchen environments. There is less wear on the horizontal seals than on the doors of conventional refrigerators, meaning that seals need replacing infrequently."

Proudly serving

"Adande units are demonstrating a 32% reduction in energy consumption, compared with the equipment used previously, delivering a further return on investment."

Cassette	Units to be built into workstations or ranges	26
Chef Base	Fitted with either heat-shield or solid tops for hot or cool cooklines	34

#### CASSETTE - ONE DRAWER - SIDE ENGINE - VCSI SERIES

# Applications

- Brings refrigeration to the heart of the kitchen.
- Bulk storage right at the point of use.
- Ideal for meat, deli and larder prep.
- Suitable for pastry and dessert prep.
- Perfect storage for garnish and 'mise en place' generally.

## Technical Data

Unit Dimensions	W43.3" (1100 mm) x D27.6" (700 mm)		
Capacity	4 x 1/1 GN pans D4" (88 lbs of food)

#### DRAWER MANAGEMENT AND ACCESSORIES

#### Worktop Upstands

2" high stainless steel Upstands (US) can be fixed to the back of all Adande worktops and heat shield tops, other than Matchbox (VCM) unit worktops.

Longer (2" high) Upstands (EUS) can be fitted to any unit (except VCM Matchbox) with Extended Heat Shield or Solid Wo-ltane

Unit Code	Side Engine		Rear Engine
	VCS	VCM	VCR
Accessories Code	US	-	US
	EUS	-	EUS
\$80/\$90			

#### Hotel Pan Racks

Hotel Pan Racks (HP) help chefs arrange and store ingredients to suit operational and menu requirements.

The Hotel Pan Rack occupies half the drawer area - adequate for most organizational needs - leaving space in the other side of the drawer to store additional items.

Hotel Pans are not included with orders for Hotel Pan Racks, but on request, stainless steel, polycarbonate or polypropylene Hotel Pans can be supplied - Price on Application.

ADAND

# Stackability

Space optimization is paramount in kitchens, and Adande understands this challenge. Our drawers can be double or triple-stacked vertically, making efficient use of vertical space. This innovative stacking capability allows you to maximize storage capacity without compromising on accessibility or functionality.

#### Performance Data - for 2 drawer units multiply the data in the table (below) by two

	/CM DRAWER orage Volume)	Energy kWhr/	Usage /24hrs	Max Heat Output	Heat C Watts/		Running C	urrent (Amps)	Starting Current

## "To create a great dish, Adande is definitely a crucial element of that"

Karl Richardson, Director of Food and Beverage, Waldorf Hilton

# Tested, Regulated & Approved

Adande drawers have been tested and awarded the UL LLC safety standard.

Adande drawers have also been tested and awarded the ETL sanitation mark, as well as the ETL verification mark.

Adande drawers also meet NSF regulations.

We are also a proud member of American Culinary Federation

Adande drawers are sanitation tested under NSF/ANSI 7:2014 to operate efficiently in ambient temperatures up to 38 °C/100.4 °F

# How to buy

#### Contact us today

Email your PO to our Adande team, Salesus@adande.com or call us on 972-442-5533

#### Contact your local Sales Representative

AQ

AutoQuotes is a web based equipment catalogue and estimating service for the catering industry, see the complete Adande range at www.autoquotes.com

Specifi is a A global equipment specification platform connecting dealers, designers & manufacturers. It contains all Adande CAD blocks, now available for download at www.specifiglobal.com

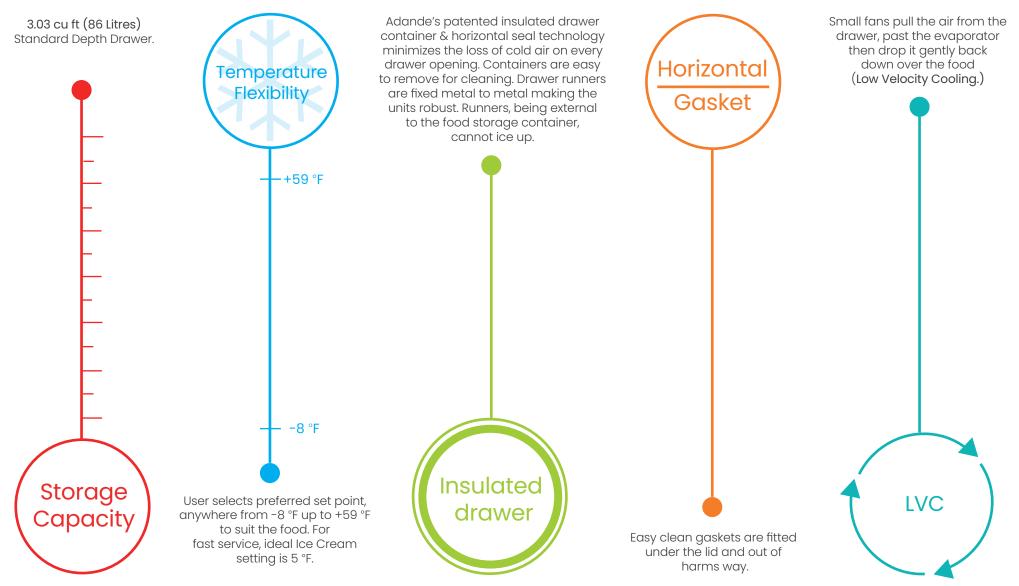

#### Freight & Shipping

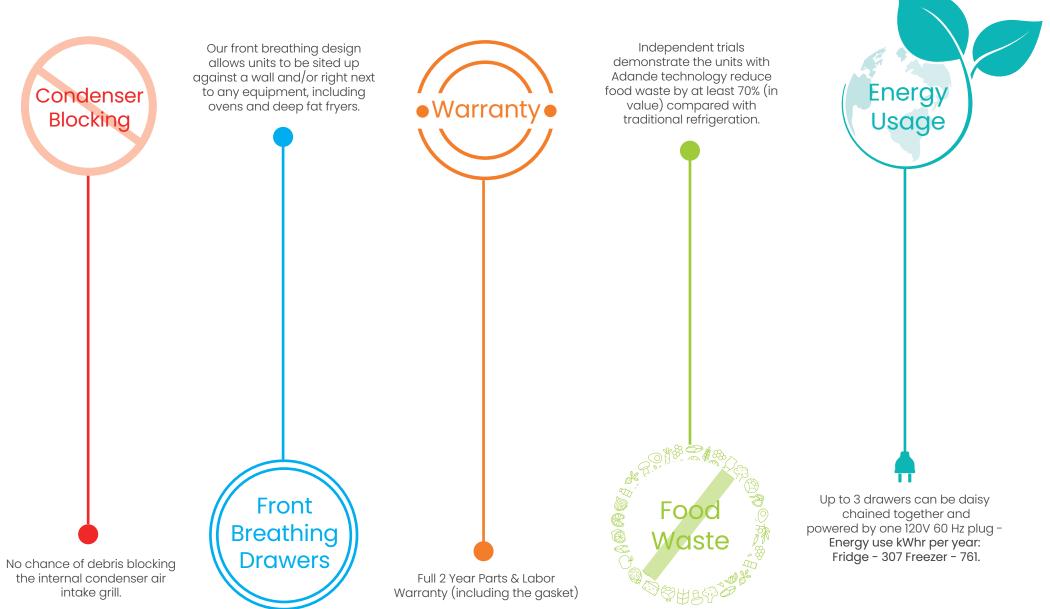

- For logistical control, Adande recommends that customers use its preferred carriers for shipping arrangements, with freight charges billed direct.
- As a courtesy, Adande can arrange shipping on a third party billing basis or, on special request, with freight invoices paid by Adande then added to our invoice.
- Adande will arrange shipping by the most cost effective route that matches customer requirements, unless otherwise instructed by the client in writing. Lift gate deliveries incur an additional charge.
- On receipt of goods, any shortages, loss or damage in transit should be marked on the delivery note and immediately reported to Adande and the delivery common carrier.
- Furthermore, shipments should be inspected on arrival, with any concealed damage reported by the consignee to the common carrier within 10 days. Freight claims are the responsibility or the consignor.
- For customers that use their own carrier, they should book the shipments and send us the appropriate paperwork.

# In case you need another reason...

# Valued and Trusted

"The compact nature of the Adande unit and the fact they can be located beneath food preparation counters means they are an ideal space saving solution."

> Thomas W. Seaman GetGo Cafe+Market

"It's a fantastic product, we use Adande at BRAT, and we're using it here at Climpson's Arch too. They are very easy to use and very practical, in fact you can build a kitchen around them. Here, we've developed the pass around the fridges and at BRAT too."

Tomos Parry Michelin star Chef, and Founder of BRAT Restaurant

BRAT

## SHEETZ

"The unique horizontal design of the Adande gives us 60% more storage space in the same floor area. This has allowed us to dispense with an ancillary freezer, which we used previously in our kitchens. This has led to savings in capital expenditure and energy costs associated with the extra piece of kit."

> Sheetz USA Convenience store

"The drawer design has several advantages over conventional fridges with doors and Adande is now the 'go to' solution for many of our projects, especially those which require the holding of food at critical and accurate temperatures."

> Russell Stilwell Founder and Principal of Next Step Design

## Key to Adande product codes

#### DRAWER UNIT TYPE

- VCS Standard Side Engine Drawer
- VCR Standard Rear Engine Drawer
- VCM Pass Through (Matchbox) Side Engine Drawer
- VCC Single deep drawer unit
- 1 or 2 Number of Drawer units in a stack, for example, VCS2 means two VCS Drawers, stacked one on top of the other VCR1 refers to a single rear engine Drawer unit

#### BASES FOR ADANDE DRAWER UNITS

- C Standard Caster Base
- HC High Caster Base for Chef Base applications
